Re: MUSIC CURRICULUM, K-12

Mr. Richard Pioli, director of the Department of Aesthetic Education,
stated that music was many things to the human being. It was another
language and a form of communication which allowed them to transcend
very definite limits of verbal communication. Music was also a
discipline with aesthetic, perceptual, and intellectual properties
through which creativity, self-discipline, and positive self-image
were developed and emotional expression was encouraged. Music was so
important to human beings that it was recognized as one of seven
basic intelligences by Harvard University's Howard Gardiner. They
were pleased to present the MCPS curriculum in music. The purpose
was to establish a lifelong relationship with music for all students.
Governed by the state fine arts bylaw, the K-12 curriculum was based
on goals which dealt with aesthetics, history, criticism, and
performance.

Dr. Phyllis Kaplan, coordinator of the elementary general music,
played an audio tape of the Chevy Chase chorus. She then showed a
video tape of the elementary school program which began with the Head
Start program and progressed up the grades. The curriculum included
an emphasis on vocal music as well as music appreciation. Children
began by responding to the beat, understanding pitch, singing alone,
and eventually focused on rhythm and melody.

Dr. Sidney Mollard, coordinator of the secondary general music
program, explained that general music at the middle level was an
extension of the elementary program and continued to provide experiences students needed to become successful listeners, performers, and music consumers. They had instruction on guitar, recorder, and keyboard. Music concepts such as melody and rhythm that were introduced in elementary school were revisited with increased levels of sophistication. Most students received general music instruction through Grade 7 in the arts rotation. In addition, students elected guitar, keyboard, or electronic music. At the high school level, the general music program was totally elective and offered a wide variety of nonperformance courses. They had several levels of instruction in guitar and keyboard. Electronic music involved creating music using tape recorders, mixers, synthesizers, and computers. They also offered music theory and composition and a course in music perspectives. All these courses satisfied the fine arts requirement and also included a component that emphasized music within its cultural and historical context.

Ms. Beth Gilbert, choral music teacher at Redland Middle School, stated that she became very offended when music was regarded as a frill or an extra. Music was academic, unique, and necessary. It fostered creativity. She explained that in ancient Greece, three subjects were taught in traditional schooling, astronomy, mathematics, and music. She commented that music intelligence was not to be taken lightly. She felt that students needed to know that there was a grander side to their souls and that becoming trained in that grander area took discipline and a commitment to excellence. At the middle level of education they zeroed in on specific training at a more advanced level. Students designed sound effect pieces which involved a knowledge of rhythm and the dynamics of pitch difference. They performed for each other and critiqued performances. The music program was the one hour when children could let go and express themselves.

Ryan Conley, student at Redland Middle School, said that he was in the Redland chorus and had been selected to participate in the Montgomery County Honors Chorus. At Redland, he studied singing, playing the guitar, and studying musicals. The students enjoyed the general music program because they were interested in it.

Dr. Mollard reported that the curriculum in choral music built on experiences begun at the elementary level. It emphasized tone production, breathing, diction, sight-singing, and other aspects of group performance. At the middle level, chorus was offered at all grade levels, and most schools had an audition chorus for students with higher levels of skill. At the high school there were five levels of choral music that ranged from general chorus for beginners to chamber singers for students with more advanced skills. The emphasis was increased on learning about music and its historical, cultural, aesthetic, and critical context. Assessment of choral performance was accomplished through participation in a number of countywide festivals.

Mr. Tony Leach, general choral music teacher at Springbrook High School, said they had four choirs, and two were audition. They
provided numerous opportunities for students to perform in small and large ensembles. The Springbrook chorus had travelled around the country and last summer went to Great Britain. Their vocalists had also distinguished themselves as members of the Montgomery County Honors Choir, Youth Choir, Maryland All-State, and the Eastern Division Choirs. They now had numerous activities in music notation and theory, history, and appreciation. Students presented a research project focused on an area of personal interest. Students developed a presentation using visual aids, performance, or other appropriate formats. One of the goals of the choral music program was to assist students to make the best vocal sound he or she could make. They also asked that students demonstrate a sense of discipline with music skills.

Ms. Rebecca Ott, Springbrook High School student, explained that she was in her senior year and had participated in honors chorus at the elementary and junior high school as well as attending the Summer School for the Performing Arts. She had been a member of the Montgomery County Youth Choir, All-State Choir, and All-Eastern Choir. She planned to attend Eastman School of Music and major in vocal performance and music education. She then performed a selection for the Board.

Dr. Charles Caputo, coordinator of the instrumental music curriculum 4-12, showed an overhead listing courses offered in instrumental music. Each course was keyed to levels of performance which represented a series of performance objectives which guided students to appropriate courses as they progressed through their schooling. Student placement in these courses was also influenced by the need to provide the correct balance of instruments to make the groups perform effectively. He showed the Board a video tape which demonstrated skills acquired in instrumental music.

Mr. Allan Hill, student at Montgomery Blair High School, explained that in fourth grade he had started playing the clarinet. At the junior high school he had participated in band. At Blair he had started out in the marching band and decided to take private lessons. Last year he had participated in the All-State Band. In tenth grade he learned saxophone and flute. At Blair he had been involved with the jazz band, symphonic band, marching band, pit orchestra, and woodwind quintet. He would be attending the New England Conservatory of Music.

Dr. James Hughes, director of astrometry at the Naval Observatory, said that he was representing those for whom music was an avocation. He noted that mathematics, music, and astronomy were very closely related. For him, music had been a source of unending pleasure. He played with the Rockville concert band. This summer they were going to Europe as a group and would play concerts throughout Germany, Austria, and Switzerland. He had two children who had gone through the MCPS music program at Gaithersburg High School. They were both Ph.D. candidates and had kept up their interest in music.
Dr. Kaplan reported that there were four main avenues through which they supported the professional growth of music teachers. New teachers participated in several days of preservice training which introduced them to the MCPS music curriculum and their responsibilities as music teachers. They also had a teacher consultant program which enabled new teachers to continue their development under the guidance of master teachers. The second professional development opportunity was the two countywide in-service meetings each year. The coordinators also provided one-on-one support for the teachers through the observation process. Finally, they worked through the Department of Staff Development to provide credit-bearing courses which teachers elected to refine their skills.

Dr. Mollard stated that the Department of Aesthetic Education sponsored 13 countywide performing groups that provided special opportunities for musically talented students. For example, a fifth grade student with exceptional singing skills could participate in one of two elementary honors choruses. On reaching the middle level, the same student could audition for the junior honors chorus and later in Grades 10-12 could participate in the Montgomery County Youth Chorus. There were three elementary school countywide bands, three orchestras, a middle level concert band, a senior jazz ensemble, and a countywide symphonic band. In addition, choral and instrumental students gained recognition through auditioning for Maryland All-State and All-Eastern Performing groups. The Department also provided arts enrichment to more than 30 elementary and middle level schools through the TAPESTRY program. This was an interdisciplinary gifted and talented program. Finally for the gifted student, they sponsored the Summer School for the Visual and Performing Arts.

Dr. Caputo explained that the cocurricular programs in music increased student motivation, fostered community service, and assisted in career development. Recruitment and cluster concerts covering performances by students in Grades K-12 helped students see where they were going. Travel, competition, and musical festivals broadened the students' understanding of other communities, provided additional performance assessments, and fostered a high level of cooperation and team spirit. In these groups, students took responsibility for organizing themselves for public performance. Transportation, appropriate dress, and getting to the performance on time were left up to the students. The feeling of being able to share one's talent by giving something back to the community was an essential element in the development of the student's personal character. These performances stimulated a high level of cooperation between the schools and the community. By performing in nursing homes, community parades, and official MCPS functions, students experienced a sense of personal satisfaction which enhanced classroom learning.

Ms. Alice McGinnis, Glen Haven music teacher, reported that this was her first year as a full-time music teacher. She also taught one and a half days a week at McKenney Hills Learning Center. She felt that
music had so much to offer in terms of the total curriculum in relating to other areas of the curriculum. Music offered a lot of opportunities for higher order intellectual skills. Music taught students to analyze, evaluate, and create. It also helped children to integrate knowledge with math, science, literature, and social studies. The music teacher had to be familiar with all aspects of the elementary school curriculum. She felt that the music program often reached the child at risk. The child at risk could experience early successes in school. ESOL students were exposed to culture and could learn about American culture and history through American folk songs.

Ms. McGinnis pointed out that music could help enhance the child's reading and language skills. The teacher helped the child with voice placement, singing with expression, and vocalizing which could extend into reading. The music teacher was one of the few teachers who might teach a child for seven consecutive years. They were a source of continuity for children to see how a child was developing throughout the elementary school years.

Dr. Jevoner Adams, principal of Glen Haven, stated that they had been working on a flexibility project integrating the music program throughout the total school curriculum. They had found that many parents and staff thought that music and the arts were an add-on. They were helping their community to realize that it was a very vital part of their curriculum. She, too, had found that music helped with at risk children. In reading and language arts, music was an additional area of support. As principal, she felt the music teacher was helpful to her because she knew all the children, not just those in one grade.

Dr. Cronin noted that Board members would be having lunch in schools. He asked that staff return to a future Board meeting for a discussion. Dr. Pitt commented that the curriculum people in the central office could have a tremendous influence on the schools. This group represented how the central office ought to be working with schools. He remarked that in teaching young children, music worked well in terms of language development. There were a lot of things they could do in teaching young children, especially those who might be at risk.

Re: EXECUTIVE SESSION

The Board met in executive session from 12:45 to 2:25 p.m. They discussed legal issues, personnel matters, and appeals. Mr. Park left the meeting during executive session and Dr. Shoenberg joined the meeting.

Re: BOARD AGENDA - MAY 9, 1989

Dr. Cronin announced that the Board would postpone the item on
Student Rights because Mr. Park was absent.

Re:  BOARD MEMBER COMMENTS

1. Mrs. Praisner stated that she was putting in the Board Office a couple of packets of materials from the National Federation of Urban-Suburban School Districts conference in Gainesville. It supplemented what they had already received from Melissa Bahr, staff assistant, who also attended the conference.

2. Mrs. Praisner said she had also placed in the Board Office a booklet on foreign language curriculum and programs available at the NSBA convention. She called attention to a section on a Spanish language curriculum which had been developed by Dr. Mimi Met.

3. Mrs. Praisner reported that she had asked the superintendent to give her some material on the expansion and continuation of the DARE program. She had received a memo; however, she wondered about the timing. Dr. Pitt replied that the DARE program was financed primarily by the Police Department. At present it was in six schools, three elementary and three J/I/M. The chief of police had indicated he expected to provide at least the same level of staffing. An evaluation group was looking at the grade placement of the program and would be making a decision shortly. If there were additional positions available, they would know in June or early July. Mrs.
Praisner asked if the program would move to different schools in different years or would stay in the same school for a period of years. Dr. Pitt agreed to provide that information.

4. Mrs. Praisner stated that the Board received a copy of a letter sent by the mayor of Gaithersburg to the County Council referring to the Kentlands Elementary School. It made reference to the Board's working with the City on accommodating bleacher seating at a cost of $200,000. It was her understanding that when it was presented to the Board they were told the bleachers had been removed from the proposal, and what the Board voted on was an expansion of the facility but not bleacher seating. Mr. Goldensohn replied that this was correct. Dr. Pitt agreed to pursue this with Dr. Rohr. Mrs. Praisner asked that the Council be informed about the Board's position.

5. Mr. Ewing commented that tomorrow night at the Arlington Career Center there was a forum cosponsored by the Metropolitan Area Boards of Education and by the Metropolitan Washington Council of Governments. Three MCPS people including the superintendent would be speaking. Dr. Pitt would be talking about school system policies and how the school system was operating now to assure student safety. In addition, two principals would be speaking on the aftermath of crisis. While they could not extend an invitation to the public to participate, if school system people and PTA leaders were interested in attending there would be some space available. Dr. Pitt commented that he was glad to see that they were working together with the local boards of education in the metropolitan area because getting together and talking about issues was very helpful.

RESOLUTION NO. 269-89  Re: EXECUTIVE SESSION - MAY 22, 1989

On recommendation of the superintendent and on motion of Dr. Shoenberg seconded by Mrs. Praisner, the following resolution was adopted unanimously:

WHEREAS, The Board of Education of Montgomery County is authorized by Section 10-508, State Government Article of the ANNOTATED CODE OF MARYLAND to conduct certain of its meetings in executive closed session; now therefore be it

RESOLVED, That the Board of Education of Montgomery County hereby conduct its meeting in executive closed session beginning on May 22, 1989, at 7:30 p.m. to discuss, consider, deliberate, and/or otherwise decide the employment, assignment, appointment, promotion, demotion, compensation, discipline, removal, or resignation of employees, appointees, or officials over whom it has jurisdiction, or any other personnel matter affecting one or more particular individuals and to comply with a specific constitutional, statutory or judicially imposed requirement that prevents public disclosures about a

RESOLVED, That the minutes of April 11, 1989, be approved.

RESOLUTION NO. 271-89   Re:  DISCUSSION OF FORMULAS FOR ALLOCATION OF STAFF TO SCHOOLS

On motion of Mr. Ewing seconded by Mrs. Praisner, the following resolution was adopted unanimously:

RESOLVED, That the Board review all of the present system formulas for allocating various kinds of staff to schools so that the Board understands the nature and purpose of those, how and by whom, and when they are applied, what variables of judgment are used in addition to the formulas and how those are used and by whom.

RESOLUTION NO. 272-89   Re:  DISCUSSION OF WEIGHTING OF CLASS SIZE

On motion of Dr. Cronin seconded by Mr. Ewing, the following resolution was adopted unanimously:

RESOLVED, That the Board of Education discuss the weighting of class size based on the number of students in those classes with special needs such as ESOL or handicapping conditions.

Re:  PROPOSED RESOLUTION TO REVIEW RECOMMENDATIONS TO GRANT GRADUATE CREDIT FOR SUMMER INSTITUTES

Mr. Ewing withdrew his motion, and Dr. Cronin requested that a letter be prepared to send to Mr. Monte which explained the process for granting credit.

RESOLUTION NO. 273-89   Re:  RECOGNITION OF STUDENTS AND STAFF

On recommendation of the superintendent and on motion of Dr. Shoenberg seconded by Mrs. Praisner, the following resolution was adopted unanimously:

WHEREAS, Many MCPS employees and students accomplished outstanding achievements, and thereby deserve recognition and praise from their peers, the superintendent, the Board of Education, and the public; and
WHEREAS, On February 8, 1983, the Board of Education unanimously adopted a policy establishing the practice of recognizing students' and employees' outstanding achievements; now therefore be it

RESOLVED, That a Recognition Evening be held on May 18, 1989, 8:00 p.m. at White Oak Intermediate School; and be it further

RESOLVED, That the following list of students and employees be so recognized and honored that evening.
