For the record, Dr. Cronin made the following statement:

"I would also note for the record that the same way for last evening when we dealt with the Poolesville situation, the staff reminded us that what is in the budget is not necessarily what the Board is voting. So where the budget last evening described the International Baccalaureate, the Board was not necessarily voting that. While the budget document for Blair may be one way, we are not necessarily voting that this evening."

"Considering that there were Board members who came to the Board in support of the Blair Cluster in 1982, and there were other Board members elected to the Board who fully recognized the Board's commitment in that area, I won't want the community to go away feeling that we are about to dismantle the Blair Cluster. That is not the way I read these documents."

Re: ADMINISTRATIVE ORGANIZATION

Dr. Cronin announced that there would be a work session on administrative organization on January 9, and there would be another month for the community to comment in writing. Mr. Ewing indicated that on December 4 he would be making a motion to hold a public hearing on this topic.

Dr. Kenneth Muir, supervisor of management and planning services, stated that they had delayed sending out copies of the proposed organization until they had direction from the Board as to how it wanted responses to come. Dr. Pitt suggested deferring this discussion until they had had a formal presentation of the proposal. He explained that he had two proposals. The first was to move from three to four areas, and the second was some reorganization of the central office. Last year some members of the Board had asked him to look at the possibility of increasing the numbers of administrative areas given the growth in the county. The proposal before the Board did not increase the total cost. The purpose of the proposal was to give them a reasonable span of communication and control. This was also an opportunity to have some balance in terms of socio-economic/racial balance within the clusters assigned to the new areas. There was no effort to change any boundaries.

Dr. Pitt said that they had put a draft proposal out for staff and community comment, and he had made a number of changes in the original proposal. For example, they had put all the elementary subject teacher specialists back into the elementary schools. They had increased the number of parent specialists to four. They had reduced four subject teacher specialists, and they had added a total of eight other specialists.

In regard to the central office, Dr. Pitt said he believed ESOL ought to be in OIPD, but he had agreed to leave it where it was for now. He indicated that he had received a letter from the auditory program, and he wanted to emphasize that nothing had changed in the auditory program. There was a notation in the proposal to indicate that most of the people in the auditory program were school-based which might have confused some people. It was still a centralized program.
