Re: BOARD/SUPERINTENDENT COMMENTS

1. Ms. Gutierrez stated that she had attended two national conferences held in Washington. The first was the National Association of Multicultural Education, and Ms. Ginny Gong was on its board of directors. It was a very exciting conference, and it was a growing association. The conference had been taped and would be shown on Channel 8. She was sorry to say that MCPS had relatively few participants while Fairfax sent 70 teachers and Prince George's sent 28 teachers. She had also attended a conference sponsored by the National Science Foundation and the Department of Education. This conference had been well attended by MCPS current staff and former staff, and it pleased her to see such a strong presence by MCPS. She thought that MCPS supported math and science in the schools, and she thought that perhaps they needed to do a better job with multicultural education.

2. Mr. Felton knew they had a school closing and delayed opening policy; however, he had received several calls from downcounty about this morning's delayed opening. Parents were not aware there was a delay and students were dropped off at schools. He would like to see some recommendations on how to ensure that either the community was aware of delayed openings or instructions on what to do when children were dropped off. He believed that the school system still had some responsibility for these children. Mrs. Gordon asked for a staff response to Mr. Felton's questions. Dr. Vance commented that they did have contingency plans he would share with the Board again. The news was given out at 5 a.m. It was on the radio in English, Chinese, and Spanish. In addition it was on the MCPS cable television, the county government cable, and the MCPS information tape. Dr. Vance said that there were 500 square miles in Montgomery County, and the area north of Shady Grove might have icy roads while other sections of the county did not have the problems with ice. On occasion when they did not close schools, they heard from parents in the upcounty. He would be open to suggestions on how to reach parents. Mr. Felton explained that his concern was the system's responsibility and liability when parents dropped their children off at a school building. Dr. Vance agreed to provide information on what their policy was under those circumstances.

3. Mr. Ewing announced that on Monday, March 6, the long-range planning subcommittee would be meeting at 7:30 p.m. He had circulated a draft agenda to the members of the subcommittee, and he would send a final agenda to all Board members. He hoped that other Board members would be able to attend.
4. Mr. Ewing hoped that Board members saw a copy of the memorandum that Mr. Kress, president of the Secondary School Administrators Association, sent to Dr. Vance responding to Mr. Ewing’s question about improving safety and security. It was a very careful and thoughtful memo, and he hoped that Dr. Vance and the staff would look at it and recommend to the Board any further actions that might be appropriate. Dr. Vance replied that Mr. Bowers had scheduled a meeting with Mr. Kress and others, and he had noted a high level of comparability between those suggestions and what had been included in the MCPS multiyear plan.

5. Mr. Ewing stated that the Board had received a memo from the superintendent on February 24, 1995, which responded to the Board’s resolution of February 15 regarding a plan to address the deadlines set in the Ruesch decision for extended summer school programs. The plan was to ensure that substantial additional time was available to special education teachers and resources teachers to do the work that needed to be done by the deadlines set. He thought the superintendent’s plan was a reasonable approach, but he was not convinced that the plan would meet the terms of the resolution. He proposed that on March 14, 1995, the Board hear what progress had been made towards meeting those deadlines and to see whether there were additional things that the Board ought to authorize. Mrs. Gemberling agreed to provide a verbal update on March 14.

RESOLUTION NO. 177-95 Re: CRITICAL UNMET NEEDS

On recommendation of the superintendent and on motion of Mrs. King seconded by Ms. Gutierrez, the following resolution was adopted unanimously by members present:

WHEREAS, The Board of Education has adopted its FY 1996 Operating Budget Requests, which it regards as reasonable, but not sufficient to meet all critical needs; and
WHEREAS, On March 23, 1993, the Board of Education forwarded a list of unmet needs to the county executive and County Council; and

WHEREAS, This list of unmet needs covered five areas of critical concern, including salary increases for employees, safety and security, educational opportunities that are equitable throughout the county, early childhood programs, and instructional and administrative technology; and

WHEREAS, The Board of Education resolved to address these critical unmet needs with a plan of multi-year budget initiatives during the FY 1995 and FY 1996 operating budget cycles; and

WHEREAS, Many of these needs were addressed with specific budget initiatives in the FY 1995 budget or are addressed in the Board's FY 1996 budget request, but many other critical needs could not be met; and

WHEREAS, After adopting its FY 1996 Operating Budget, the Board believes there are still significant and critical unmet needs for the Montgomery County Public Schools that were not funded due to the severe fiscal constraints; now therefore be it

Resolved, That the members of the Board of Education believe there are critical unmet needs that the Board's FY 1996 Operating Budget Request could not address; and be it further

Resolved, That the Board adopt the attached list of critical unmet needs that are essential to maintain the Montgomery County Public Schools' standards of excellence; and be it further

Resolved, That the Board approve the multi-year budget initiatives plan, developed in conjunction with the superintendent and listing the specific services that must be implemented over the next five years to address its critical unmet needs; and be it further

Resolved, That a copy of this resolution, a list of critical unmet needs, and a multi-year budget initiatives plan be submitted to the county executive and County Council, and that these also be shared with employees, parents, and the public.

Critical Unmet Needs

Expanded Services for Students with Special Needs - The Board has emphasized equity in the educational opportunities it provides, but equity cannot be fully achieved when resources are not increasing at the same rate as the growth in the number of students with special needs -- and this is the case today as well as for the foreseeable future. Among the students requiring more help are those who are educationally and economically disadvantaged, those who require a variety of special education services, those whose native language is not English, and those who are gifted and talented. These are students for whom far fewer resources are available today than were available five years ago. Specifically, the Board believes more resources are needed for Chapter 1, psychological assessments, occupational and physical therapy, speech pathology, ESOL and ESOL transition, gifted and talented, and QIE.
Increased Emphasis on Early Childhood - The Board remains committed to expanding early childhood services, based on a growing body of research evidence that show high levels of educational effectiveness as the return on this investment. But the needs of young children will be fully met only if we make an immediate investment in early childhood services, including greater cooperation with other county government agencies.

Strengthened Educational Accountability - The Board is committed to raising and maintaining high standards and to improving academic achievement for all students. To ensure that programs are effective, the Board believes it must strengthen our school system’s educational accountability by exploring new and better methods for teacher evaluations, developing new assessments of student performance, researching new approaches that show promise for improving achievement, and analyzing the cost effectiveness of MCPS programs and services.

Expand Our Investment in Staff - The key to providing quality educational services lies in the hands of those who serve our children directly in classrooms and schools, or who serve them indirectly by developing curricula, purchasing textbooks, or inspecting school buildings. Therefore, the Board strongly supports a strengthened investment in its staff by providing reasonable increases in salaries and by providing continuous opportunities for training and development. Staff training efforts must address leadership, Success for Every Student, Global Access, math, science, special education, and implementation of new programs.

Encourage Improved and Innovative Learning Models - It is critical that improved educational practices be implemented and that innovative learning models be developed, particularly in our high schools. We can study educational reforms being modeled across the nation, but we must test the best of these ideas ... and we must develop and support creativity and innovation in our schools.

Enhanced Safety and Security - Safe schools are a threshold issue. Students and staff must be secure if learning is to occur. Parents must be confident their children are safe if public confidence is to be maintained. Therefore, the Board strongly supports the superintendent’s recommendations to enhance his school security plan.

Increased Building Maintenance - Well maintained schools are essential to effective learning and to public belief in educational quality. MCPS has an aging inventory of buildings. Eighty-six of our schools will be thirty years old within the next six year CIP, yet only twenty-six of these schools will be modernized during this period. As a result, the Board has voiced strong support for increasing maintenance services to a level that ensures a responsible investment in our property.

Expanded Instructional and Administrative Technology - The Board continues to seek full implementation of Global Access. To maintain our status as a world class school system, this plan must be implemented at a pace that ensures our students have the technological tools needed to obtain an up-to-date education. School systems around the country are acquiring computers and quickly discovering their best uses, and we must follow suit. The Board recognizes, however, that computers are not an end in themselves, they are a tool -- a tool intended to help students better learn the concepts being taught under our current curriculum. Beyond the training previously mentioned, our operating costs should include the resources needed for continued development of a more effective administrative information system and for continued review and implementation of technological innovations.
