RESOLUTION NO. 469-99  Re:  APPROVAL OF THE AGENDA

On recommendation of the Superintendent and on motion of Mr. Abrams seconded by Mrs. King, the following resolution was adopted unanimously by members present:

Resolved, That Board of Education amend its agenda to place consent and personnel items after Board and Superintendent Comment and approve its amended agenda for August 24, 1999.

Re:  ANNOUNCEMENT

Mr. Felton announced that Mrs. Gordon’s absence was due to the death of her father. Mr. Burnett was detained at work where he was making a presentation.

Re:  BOARD/SUPERINTENDENT COMMENTS

Mrs. King welcomed Dr. Weast to his first meeting of the Board. In the first three weeks, there was evidence that the year would be outstanding.

Mrs. O’Neill welcomed Dr. Weast and stated that everyone was excited and enthused with the past three weeks and his personal contact with employees.

Mr. Abrams extended greetings to Dr. Weast from the officials he had met at the MACO Conference. Dr. Weast’s level of interest and cooperation with state and county officials was very favorable.

Ms. Sampedro greeted Dr. Weast to Montgomery County on behalf of all MCPS students.

Dr. Weast thanked the Board. It had been a fast and pleasant three weeks as Superintendent. He had some early impressions of MCPS, including acronyms and educationaleze. He had found a remarkable staff willing to help each student succeed. He looked forward to working with the Board and staff.

RESOLUTION NO. 476-99  Re: NORTHWEST ELEMENTARY SCHOOL #6 SITE EXPANSION

On recommendation of the Superintendent and on motion of Mr. Abrams seconded by Ms. Signer, the following resolution was adopted unanimously by members present:

WHEREAS, On March 9, 1999, the Board of Education voted to consider the Northwest Elementary School #6 as a potential site for the Longview School program; and

WHEREAS, The Board of Education also authorized staff to pursue the purchase of nine proposed building lots that lie adjacent to the west boundary of the school site to accommodate a larger building; and

WHEREAS, The additional land can be used for the elementary school program even if the Longview Program is not located at the site; and

WHEREAS, Funds are available in the Advance Land Acquisition Revolving Fund for the purchase of land for expansion of sites when opportunities arise; and

WHEREAS, An independent contract appraisal of the nine proposed building lots estimates their combined fair market value to be $963,050; and

WHEREAS, Staff members have met with the owner and made an offer based on the appraised value, contingent on the approval of the Board of Education; and
WHEREAS, The owner has offered to pre-grade the site as part of the purchase of the land at a cost significantly less than current prices for similar work; now therefore be it

Resolved, That the Agreement of Sale for the purchase of the additional acreage to expand the Northwest Elementary School #6 be executed by the president and secretary of the Board of Education for a sale price not to exceed $963,050; and be it further

Resolved, That the Agreement of Sale include a provision for pre-grading the entire site at a cost of $642,500; and be it further

Resolved, That the Board of Education request a supplementary appropriation to its FY 2000 Capital Budget to reimburse the Advance Land Acquisition Revolving Fund for the site expansion and pre-grading.

Resolved, That the county executive recommend approval for this supplemental appropriation to the County Council.

Re: DISCUSSION OF FY 1999 OPERATING BUDGET CATEGORICAL TRANSFER

Ms. Signer stated that she had received some questions from Mr. Robert Astrove about the process for categorical transfers, and whether or not the Board and County Council should approve the transfers throughout the year rather than at the end of the year. Mr. Astrove had filed a Freedom of Information Act request and he had not received a reply.

In terms of the first issue, Mr. Bowers replied that this question had come up over the past fifteen to twenty years. MCPS had received legal advice on the accepted and preferred process to transfer funds at the end of the year. If it were done throughout the year and the amount changed, funds would be moved in and out of categories regularly. End-of-year transfers are how the county government handles its accounts. The grants are done individually to keep them separate from the operating budget.
Ms. Signer stated that if MCPS continued to do categorical transfers at the end of the year, Policy BAA should be amended since it required the Board to approve transfers on a monthly basis.

To the second issue, Dr. Spatz replied that Mr. Astrove’s request was due August 20, 1999, and he had been contacted. The material will be sent to Mr. Astrove very shortly, and he would receive all the items he requested.

RESOLUTION NO. 487-99  Re: FY 1999 OPERATING BUDGET CATEGORICAL TRANSFER

On recommendation of the Superintendent and on motion of Mr. Abrams seconded by Mrs. King, the following resolution was adopted unanimously by members present:

WHEREAS, Category 1 Administration reflected a deficit as of June 30, 1999, due to greater than anticipated legal fees; and

WHEREAS, Category 2 Mid-level Administration reflected a deficit as of June 30, 1999, due to lower than anticipated lapse and turnover savings; and

WHEREAS, Category 4 Textbooks and Instructional Supplies reflected a deficit as of June 30, 1999, due to greater than anticipated ordering of textbooks and instructional supplies for the elementary school balanced literacy program in anticipation of its expansion in 1999-2000; and

WHEREAS, Category 5 Other Instructional Costs reflected a deficit as of June 30, 1999, as a result of a new copier agreement and higher tuition costs for students living in out-of-county living arrangements; and

WHEREAS, Category 7 Student Personnel Services reflected a deficit as of June 30, 1999, due to lower than anticipated lapse and turnover savings; and

WHEREAS, Category 8 Health Services reflected a deficit as of June 30, 1999, due to higher than anticipated program needs; and

WHEREAS, Category 10 Operation of Plant and Equipment reflected a deficit as of June 30, 1999, due to greater than anticipated electricity rates and water consumption, the financial impact of January’s ice storm, and a deficit in the reimbursement from the Interagency Coordinating Board for after-school use of school buildings; and
WHEREAS, The required funds are available for transfer from Category 3 Instructional Salaries, Category 6 Special Education, Category 9 Student Transportation, and Category 12 Fixed Charges;

and

WHEREAS, Transfers are not required from instructional categories to non-instructional categories; now therefore be it

Resolved, That the superintendent of schools be authorized, subject to the approval of the County Council, to effect the following transfers:

Re:  STATUS REPORT ON THE MCPS ACCOUNTABILITY FRAMEWORK

Dr. Weast invited the following people to the table: Dr. Marlene Hartzman, director of educational accountability; Dr. Jose Stevenson, coordinator of the testing unit; Mrs. Eoline Cary, principal at Brooke Grove Elementary School and co-chair of the standards
committee; and Ms. Gwen Parker, 8th grade world studies teacher at Sligo Middle School. Staff members from the Department of Academic Programs and members of the standards committee were in the audience.

**Background**
In the fall of 1992 MCPS embarked on the task of designing and implementing an assessment infrastructure that would measure grade-level performance in mathematics, reading, and writing and monitor student performance over time. This task yielded the criterion-referenced testing program (CRT) which provides annual testing in Grades 3-8 and includes multiple-choice, open-ended, and extended writing formats. Student and school performances are examined in relation to proficiency standards in reading and mathematics set by stakeholders from across the school system and the community. Reports concerning individual and group achievement are made annually to parents, schools, and teachers.

**Reliability, Validity, and Utility of Scores**
From the outset, the overriding commitment has been to design an assessment system that would yield valid, reliable, and meaningful scores. Thus, content teachers write items and link them to specific curricular objectives to ensure that the assessments are valid. Analyses of the reliability of CRT scores have shown that the items on the tests consistently measure the acquisition and application of math and reading skills. Test publishers generally consider consistency of items to be acceptable when there is a .80 relationship (reliability coefficient). The CRT reliability coefficients have averaged .88 for reading and .92 for math across grade levels.

The reliability of CRT scores also is reflected on the teacher scoring of the open-ended and writing assessments. As a result of intensive training that prepares teachers for what to look for in a student's work and then how to rate that work, the likelihood that a student will receive the same score from two different teacher-scorers is 90 percent for reading and 97 percent for math.

One important result of teacher scoring of CRT assessments is the knowledge they gain from this experience. This knowledge is now used to inform the delivery of instruction in individual classrooms. The challenge is to systematically disseminate this knowledge and the resulting changes in classroom practices systemwide.

In addition to this knowledge, the utility of the CRT scores for MCPS also is expressed in their ability to serve as the basis for communicating specific instructional expectations for student achievement. Thus, when the CRT scores are disaggregated by race/ethnicity they reveal a gap in student achievement between African American and Hispanic students and Asian and White students.
Further, the existing linking of test items to curricular objectives allows CRT scores to serve as indicators of future student success in the curriculum. For example, eighth graders scoring 650 on the mathematics CRT scale have an 80 percent probability of earning a grade of "C" or higher in ninth-grade algebra, but the picture is different when the data are disaggregated. Thus, CRT scores provide a road map for specific classroom interventions which can lead to improved student performance.

**High Standards and Links to External Criteria**

Setting high standards for student performance has enabled the school system to make meaningful comparisons between students in MCPS and their peers nationally. The design of the assessment program contains embedded norm-referenced components to facilitate these comparisons.

- Fifty percent of MCPS Grade 3 students scored at or above the 77th percentile nationally on the reading multiple-choice, norm-referenced component of the Metropolitan Achievement Test, Seventh Edition, or MAT-7.
- Similarly, 50 percent of MCPS Grade 4 and Grade 6 students scored at or above the 81st and 92nd percentile nationally on the open-ended mathematics GOALS assessment.
- Few MCPS students performed below the 30th national percentile on the MAT-7.
- Likewise, on the mathematics GOALS assessment, only 16.1 percent of MCPS students in grade 4 scored below the 30th percentile, compared to 30 percent nationally.

MCPS standards on the CRT assessments reflect high levels of performance on norm-referenced tests. A sample of MCPS students took both the CRT and the nationally-normed Comprehensive Tests of Basic Skills (CTBS) allowing the scores on the two measures to be linked.

- Students scoring at the 25th percentile among all MCPS students on the Grades 4 and 6 reading CRT scored just above the 50th percentile nationally on the CTBS.
- Students scoring at the 50th percentile among all MCPS students on the Grades 4 and 6 reading CRT scored at approximately the 65th percentile nationally on the CTBS.
- High Standards for Proficiency: The MCPS criterion for schools to achieve "satisfactory" math performance (i.e., schools having at least 75 percent of their students attaining "proficiency" on the CRT) is higher than the State of Maryland School Performance Assessment Program (MSPAP) "satisfactory" standard (i.e., schools having at least 70 percent of their students attaining "satisfactory" or higher on the MSPAP).
• Every school in MCPS that achieved "satisfactory" on the Grade 5 math CRT also achieved "satisfactory" on the MSPAP standard. However, some schools that met the MSPAP "satisfactory" standard did not meet the MCPS "satisfactory" CRT standard.

• CRT Scores and Academic Performance Estimate SAT Scores: Grade 8 CRT scores, combined with sustained academic performance in high school, provide strong indicators of Scholastic Aptitude Test (SAT) scores. Students who achieve an eighth grade CRT score of 800 in either reading or math, along with continued academic success in high school, most likely will attain a score at or above the median SAT score of freshmen students entering Johns Hopkins University or the University of Michigan.

**Ongoing Activities**

Much has been learned during the past seven years about the power of the assessment program to advance the instructional agenda. The assessments have triggered curriculum debates, and the scoring process has heightened awareness of specific content expectations. Local-school requests for and use of student and school data have greatly increased. Schools are analyzing their data and developing strategic plans to increase student achievement. Assessment training conducted annually for school leadership teams are valued, and schools have participated in record numbers.

Parents and community members continue to show strong interest in the assessment results for their own students as well as for their schools. Many more schools are offering PTA presentations on assessments, including tips for parents. Other assessment activities include the following:

• Student Samplers, which contain sample CRT and MSPAP test items as well as copies of the rubrics used to score the tests have been printed for each student in Grades 3-8. Schools are encouraged to send the completed sampler home to parents to increase their familiarity with these assessments and their demands on students.

• *TestWise*, a yearly newsletter, is distributed to every staff member, forging a communication link among summer scorers, item writers, and teaching staff.

• Participation in a one-day scoring/training process (Local School Scoring) at the close of school in June 1999 increased from six elementary schools sending 200 teachers in 1998 to twenty elementary and middle schools sending almost 900 teachers on June 17, 1999. Twice as many schools expressed an interest in participating as there were openings for participants.

However popular and useful these activities are, the challenge is to use these experiences to develop an action plan that will result in improved student achievement with an
emphasize on the performance gap between African American and Hispanic and Asian and White students.

**Next Steps**

1. Principals and teachers must be fully trained to use the CRT results to improve student achievement.
2. An important next step for the assessment program will be finalizing the reading/language arts standard for the open-ended component and reporting it to parents in fall 2000. Following the establishment of this open-ended reading standard, the extended-writing standard will be set and results will be reported to parents in fall 2001 along with scores on language usage.
3. Another major task will be to continue focusing on the links between the CRTs and the new state high-school assessment program, with particular attention to formats and types of items.
4. During the 1999-2000 school year, there will be a large-scale pilot of math and reading assessments in Grade 2 in 54 Phase I Reading Initiative schools, thus extending the Early Childhood Assessment Program (ECAP). This follows a successful pilot undertaken in seven schools during the past two school years.

Over the past seven years the potential for using the CRTs to monitor the academic progress of students and schools in MCPS has become increasingly clear. The assessment program has provided specific information for diagnosis, early intervention, and the targeting of instructional resources and emphases. Many of our schools are using assessment results to change the way instruction is delivered, resulting in improved student achievement for all of their students. However, within MCPS there is uneven progress in this area. The challenge facing our very large school system will be to ensure that the best practices for using assessment data to inform classroom practice will be implemented in every one of our schools.

Re: **DISCUSSION**

Mr. Felton commented that the Board was always energized by presentations on accountability. When some of the data were presented in December, there was a suggestion that it was an issue of expectations and not simply poverty. He was optimistic that the school system would get at the problem and begin to identify solutions. His concern was that as the school system moved forward, there was the anticipation that MCPS will close the gap in test scores. Mr. Felton asked how the school system would get at the issue of zero tolerance for teachers with low expectations for certain students. Dr. Seleznow replied that there were many things to do on many levels, such as to hire teachers with cultural competence with students, ask teachers not to quit with certain
students, request administrators not to give up on students, establish a support system for the classroom teacher to improve student performance, set clear expectations for all staff, and train teachers for success. Dr. Weast stated that the system cannot play the “blame game.” The school system must look at the achievement results by ethnic group and socioeconomic status. There must be research about African Americans and Hispanic student achievement and why they are not doing as well as others. There must be a rational approach about the importance of the issue since it is fundamental to all school systems. Surprisingly, as the economy has done well over the past few years, the number of children in poverty has risen. He hoped the school system would ask (1) what are the specific factors contributing to the discrepancy in the academic performance of students, (2) what combination of schooling conditions and practices hold the greatest promise of improving learning for all students in MCPS, and (3) how MCPS will bridge the achievement discrepancy through a focused, comprehensive, and integrated plan.

Mrs. O'Neill had observed the scoring of the CRTs, and the conversations and debates among the teachers were very energized and impressive. As the school system moves forward success for all students, there are opportunities for classroom teachers to learn about the CRTs and participate in the scoring. The data on student achievement must be gathered early to ascertain appropriate achievement. However, it seemed like the entire month of May was devoted to testing for her 3rd grader. Beyond the testing, she was not sure how much learning took place for her child during that period. The school system needs the data, but it must continue student learning and not just focus on the test.

Mr. Abrams observed that the charts on productive and non-productive schools were based on a one-year phenomenon. He asked if staff had looked at multi-year comparisons. Dr. Larson replied that it was multi-grade level in certain years. Mr. Abrams was curious to know the patterns and impact of teachers, principals, and other variables. He thought that practices would not be by school, but classroom. In looking at classroom practices, the data load would yield richer results.

Ms. Signer noted that parents are interested in the test results for their child, not the school. She mentioned the work done by Steve Bedford, principal at Col. E. Brooke Lee Middle School. He formats data on a spreadsheet by classroom. He meets with teachers at the beginning of the year and requests a plan for the children based on their CRT scores. The data are reviewed again at the end of the year to ascertain student performance which, in turn, is tied to teacher evaluation. She hoped that the new Student Information System would aggregate the information in this manner. Regarding the fourth grade math average against the spring fifth grade math average, Ms. Signer asked if only statistically significant results were used, and what was the standard deviation. Dr. Larson replied that each school got the average gains among their students. Ms. Signer thought that the next step was something in the nature of a value-added approach. She asked why
the seventh and eighth grade CRTs did a better job at predicting a grade of “C” in algebra than in honors geometry. Dr. Larson explained the strength of the prediction was the slope of the curve on the chart. Students with a CRT grade below 650 would have a low probably of success in algebra, but they needed a higher score for success in geometry in ninth grade since that course is a more difficult subject.

Mrs. King liked what she had heard. As the school system moves through the process and makes changes, she wanted parents to be informed about the changes and the progress their children had made, using “parent-friendly” language.

Mr. Felton noted that pre-kindergarten programs would help students in MCPS be more successful. Also, teachers need a support system necessary to provide for student achievement. He asked what the school system could do to shift or the realignment of resources. What will the community see as a signal that something is happening differently in the school system? Dr. Seleznow explained that staff were questioning everything. After the data were analyzed, a structure to address the variance of school performance would be developed to improve student achievement. Parents may see more of an emphasis and focus on early childhood.

Dr. Weast pointed out that the problem of poor student achievement must be addressed early. There must be an alignment of early childhood providers and the public school system. An educational plan should encompass birth to post-secondary education. The whole reorganization plan should focus on the five or six factors that affect student achievement.

RESOLUTION NO. 499-99  Re: PRESENTATION OF PRELIMINARY PLANS - BURNT MILLS ELEMENTARY SCHOOL GYMNASIUM ADDITION

RESOLUTION NO. 502-99  Re:  CLOSED SESSION RESOLUTION

On recommendation of the Superintendent and on motion of Mr. Abrams seconded by Mrs. King, the following resolution was adopted unanimously by members present:

WHEREAS, The Board of Education of Montgomery County is authorized by the Education Article and State Government Article of the Annotated Code of Maryland to conduct certain meetings or portions of its meetings in closed sessions; now therefore be it
Resolved, That the Board of Education of Montgomery County conduct a portion of its meeting on Tuesday, September 14, 1999, in Room 120 of the Carver Educational Services Center from 8:30 to 10:00 a.m. and 12 noon to 2:00 p.m. to discuss personnel matters, as permitted under Section 10-508(a)(1) of the State Government Article, consult with counsel to obtain legal advice, as permitted by Section 10-508(a)(7) of the State Government Article; and to review and adjudicate appeals in its quasi-judicial capacity and to discuss matters of an executive function outside the purview of the Open Meetings Act (Section 10-503(a) of the State Government Article); and be it further

Resolved, That such meetings shall continue in closed session until the completion of business.

Re: REPORT OF CLOSED SESSION

On July 28, 1999, by unanimous vote, the Board of Education voted to conduct a closed session as permitted under the Education Article § 4-107 and State Government Article § 10-501, et seq., of the Annotated Code of Maryland.

The Montgomery County Board of Education met in closed session on July 28, 1999, from 7:00 to 9:00 and 10:20 to 11:00 p.m. in Room 120, Carver Educational Services Center, Rockville, Maryland, and

2. Reviewed the Superintendent’s recommendations for the appointments as principal of Twinbrook Elementary School, principal on special assignment, Organization Development Team, supervisor of Guidance Services, coordinator of Athletics, and curriculum coordinator for Instrumental Music, subsequent to which the vote to approve the appointments were taken in open session.
3. Discussed the acquisition of real estate property for a public purpose.
4. Conferrred with legal counsel on pension legislation
5. Took action on the salary of the Staff Director.

In attendance at part or all of the above closed sessions were: Steve Abrams, Elizabeth Arons, Larry Bowers, Kermit Burnett, Reggie Felton, Wes Girling, Bea Gordon, Bob Hacker, Richard Hawes, Marie Heck, Nancy King, George Margolies, Patricia O’Neill, Roz

Re: NEW BUSINESS

Mr. Felton moved and Mr. Abrams seconded the following:

WHEREAS, It is the responsibility of the Board of Education to make the final decision on naming of schools; and

WHEREAS, Board Policy FFA ("Naming Schools") authorizes the superintendent of schools to establish a process for the community to recommend to the Board the name of the new school; and

WHEREAS, The number of schools scheduled for construction in future years is very limited; now therefore be it

Resolved, That, prior to the convening of any name-recognition committee hereafter established pursuant to Regulation FFA-RA, the Board shall develop a listing of up to four names to be submitted to the committee for its consideration, and that such committee shall be charged with the responsibility of recommending, in priority order, its preference from among the listing of names provided by the Board of Education; and be it further

Resolved, That, Policy FFA and Regulation FFA-RA be revised to conform to this resolution.
