Re: **BOARD/SUPERINTENDENT COMMENTS**

Dr. Weast attended a wonderful conference last week for students who attend academy programs in MCPS high schools. More than 500 students participated in the professional development conference, called “Linking Students to the Business Community.” The program included breakout sessions, mock job interviews conducted by business professionals, and a keynote address from Ed Hodge, chief administrative officer of Adventist HealthCare. The conference was sponsored by the Montgomery County Business Roundtable for Education, Montgomery College (MC), and the MCPS Division of Career & Technology Education. Thanks to the school system’s partners at MC and in the business community for providing this opportunity for students.

The importance of effective partnerships was highlighted in a March 23 article in the *Wall Street Journal* called “Getting an Education in College Success.” The MCPS-Montgomery College partnership received kudos for providing supports to students that help them transition effectively from high school to college. PSAT testing for 10th grade students, the Gateway to College program, information for students and parents such as the “PrepTalk” newsletter and videos, and the Leap to the Future after-school program at Kennedy High School are examples of programs that have helped students prepare for the college experience.

Mr. Johnson reported that he will attend the SGA Convention in Ocean City prior to the NSBA Conference in Chicago.
Ms. Ervin stated that she attended the 1st Annual Disabilities Summit, and she also attended a Women’s History Month commemoration at John F. Kennedy High School.

Mrs. Navarro said she attended a study circle at Eastern Middle School, and it was extraordinary with true parental engagement. It was for Latino parents as they bridge into other parent groups.

Mr. Romero reported that the Board met with the Walter Johnson Cluster, and it was very informative meeting.

Mr. Abrams stated that he visited Bells Mill Elementary School with other Board members. The community raised a question about the standards for portables. Several states are enacting regulations for portable classrooms, but Maryland has no regulations. The current standard for Maryland funding is a structural consideration only. The second issue that was raised concerned the commitment of the school system on “sick” facilities. He knew that Dr. Weast had a schedule for the replacement of portables, and portables will be replaced if they are not usable. Further testing is being conducted, and there will be a review of programmatic options.

Mr. Abrams commended the Board officers for a demonstration of restraint before the Education Committee of the County Council. He was not enamored by the substance or the process used by the Inspector General. His worst fears were confirmed by the performance of a couple of members of the Education Committee. For review, the Inspector General criticized the school system for not presenting a sufficient number of options to the Council and for misleading the Council on the lowest cost option. Therefore, Mr. Abrams was astounded when Councilman Denis attempted to remove from consideration one of the options of the task force. He had no idea what was meant when Mr. Denis suggested that the cost comparisons should be examined by an objective third party.

Mrs. O’Neill commented on the meeting with the Bethesda-Chevy Chase Cluster, and that meeting gave insight into the workings of the community.

**Mr. Abrams and Mr. Romero left the meeting.

Education of Students With Disabilities

A. PURPOSE

To affirm the Board of Education’s commitment to the principles articulated in federal and state law regarding the provision of a free and appropriate public education (FAPE), the protection of the rights of all eligible students with disabilities, and the principle that every child can learn and succeed.

B. ISSUE

Federal and state law govern the provision of early intervention and special education services to students with disabilities from birth through the end of the school year in which they turn 21 years old. These laws require procedures for the identification, evaluation, and educational placement of the child. Under these laws, qualified children are ensured the provision of FAPE in accordance with
Individualized Education Program (IEP) or are provided services under an Individualized Family Service Plan (IFSP).

C. POSITION

Montgomery County Public Schools (MCPS) is committed to:

1. Providing opportunities for all students to achieve at the highest possible levels, as well as access a comprehensive, collaborative, and individualized support system that enables students with disabilities to make progress in the MCPS curriculum.

2. Creating a climate of acceptance, respect, and high expectations that result in academic achievement and the attainment of other important knowledge and skills for all students, based on the principle that every child can learn and succeed. The development of effective programs for all students depends upon the energy, the concern, the dedication, and leadership demonstrated at all levels of the school system as well as upon adequate budgetary provisions.

3. Improving educational results for children with disabilities by assuring their access to instruction in the general education class to the maximum extent possible.

4. The participation to the maximum extent possible of students with disabilities with non-disabled peers in all aspects of school life, including academic, social, and extracurricular activities, as a critical component of their educational experience.

5. Providing a continuum of services for students with disabilities and educating them in the least restrictive environment appropriate for the child to ensure success for every student. Consideration must first be given to providing services in the student’s home school.

6. Collaborating with government agencies, the business sector, and families to provide an educational program that prepares students with disabilities for self-sufficient and productive lives as full participating members of our society and leads to positive post-school results in education and training, employment, accessing adult services, independent living, and community participation.

7. Working with parents in constructive, collaborative partnerships to provide the home/school link fundamental to student success.
8. All staff, both special and general education personnel, share accountability for the education of students with disabilities.

9. Developing and implementing systemwide supportive general education interventions and culturally responsive instructional practices that help to eliminate any misidentification and/or misclassification of students, particularly minority students, with special attention to the specific disability categories of emotional disturbance, mental retardation, and specific learning disability.

10. Actively seeking to locate, identify, and evaluate children residing in the county or who have been placed by their parents in private schools located in the county, including children who are homeless, highly mobile, or wards of the state, who are suspected by parent, school, or other responsible source of being a child with a disability whether enrolled in public, private, or religious schools. Outreach activities are conducted with interagency collaboration.

D. DESIRED OUTCOME

An educational system that is committed to the success of all students, requires accountability for the performance results of all students, and fosters and promotes respect, acceptance, and high expectations for all students.

E. REVIEW AND REPORTING

This policy will be reviewed in accordance with the Board of Education policy review process.
