Re: BOARD/SUPERINTENDENT COMMENTS

Mr. Moskowitz commended the Gaithersburg Cluster for the meeting where they had an opportunity to see a student-made video that toured the school. He congratulated Quratul-Ann Malik the newly elected student member of the Board. He extended his regards to the Montgomery County Muslim Council which hosted a dinner where he expressed his
gratitude. He attended an awards breakfast for outstanding food and nutrition employees. He toured RICA and spoke with the students and staff.

Dr. Docca reported that she visited Quince Orchard High School and met with the senior class officers and toured the building.

Mr. Abrams noted that Montgomery County Public Schools has become fertile ground for college sports recruiters.

Ms. Brandman added to the comments of her colleagues. She visited the Global Wizards, an Interages geography project. She attended the ESOL Awards Day, which she said was a wonderful celebration. She and Mr. Moskowitz visited RICA, at the invitation of Senator Forehand, because she wanted a sense of the facility and a better understanding of students’ needs. She said the level of commitment and collaboration of the educational and clinical staff was inspiring. They discussed the need for additional state funding. The only regret was that she learned afterwards that some RICA parents has been excluded from the tour, and she apologized for that oversight.

Mrs. O’Neill reported that she attended the Marriott Spirit to Serve Awards, where the following schools received awards: Walter Johnson High School, John Poole Middle School, and Bannockburn Elementary School. On April 30, Mrs. O’Neill had the opportunity to represent the National School Boards Association in the School of the Future student design competition. She was one of 20 judges. Two MCPS schools entered the competition – John Poole and Westland middle schools.

Ms. Cox noted that she visited Wheaton High School and met with the senior class officers prior to the graduation ceremonies. She was very impressed with the relationship of students and staff. One of the problems is that students are receiving scholarships to elite colleges, but parents need them at home. She hoped that the system would do whatever possible to help these students.

Mr. Barclay reported that he visited with the seniors at James Hubert Blake High School, and he attended a play at Blake which was amazing. He noted that the dedication of the students and staff makes a difference in the success of the those in the performing arts productions. Also, he attended the closing ceremonies of the George B. Thomas Learning Academy at Albert Einstein High School. He said one highlight was a student-made video about what happens at the academy. Mr. Barclay could not attend the Gaithersburg Cluster meeting because he was attending an IMPACT Awards event in Silver Spring. IMPACT is doing a great job in getting more people engaged and developing leaders in the community. Mr. Barclay said that later in the meeting he wanted the community to know that he supported the consent item on Northwood High School’s construction since this would make the school more comparable with the other Downcounty Consortium schools.
Dr. Weast thanked the Board members for attending school and community meetings and events. This year, students set a record for the number of scholarships earned. Also, there is a need to push on with the commitment to Middle School Reform by increased academic achievement with eligibility.

** Mr. Barclay left the meeting at this point.

Re: **UPDATE ON HSA BRIDGE PLAN IMPLEMENTATION**

Dr. Weast invited the following people to the table: Mr. Stephen L. Bedford, chief school performance officer, Office of School Performance; Dr. Stacy L. Scott, associate superintendent, Office of Shared Accountability; and Mrs. Chrisandra A. Richardson, director, Academic Support Initiatives, Office of School Performance.

The Board was given an update on the implementation of the Bridge Plan for Academic Validation (Bridge Plan), an alternative route introduced by the Maryland State Department of Education (MSDE) in November 2007 to help identified students meet the High School Assessment (HSA) graduation requirement.

The goal of MCPS is to work proactively to prepare all students to successfully pass the HSAs to meet the graduation requirement. For those students who need this alternate pathway, MCPS will ensure that all required components of the Bridge Plan are established and implemented consistently across schools.

Staff will continue to keep the Board apprised of MCPS’ readiness for Bridge Plan implementation, as well as any other HSA updates.

Re: **DISCUSSION**

Mrs. O’Neill noted that the numbers indicate that 10 percent of the Class of 2009 will not graduate with their class unless they complete the Bridge Plan successfully. Mrs. O’Neill worked on the state’s work group, which concluded that there was need for something beyond the paper-and-pencil test. Furthermore, she said it is tremendously unfair to the Class to 2009 to be held to essay-based tests when the Class of 2010 will have a different kind of test (with bubbles). The HSAs are not very well thought out or great tests with the ability to predict college success or work skills. The Board believes in accountability, but the HSAs have problems.

Mr. Abrams asked if there was a requirement to pass HSAs to get a GED. Staff replied in the negative. Mr. Abrams inquired about the incentives for a student to go through the HSA alternative when they short-circuit the HSAs and get a GED. What are the drawbacks to a GED? Staff explained that the child should go through an education that prepares
him/her for the future. The difference between a GED and high school diploma is the caliber of instruction. Also, not all colleges will accept a GED.

Mr. Abrams thought the intelligent wanted to know that an alternative program would take into account when tests are given. Students using the Bridge Plan will use it in their junior or senior year because they have taken the exams and not succeeded. If the Bridge Plan was a viable alternative, the plan should be offered in the ninth grade in order for the student to achieve success in sequence. This plan makes it onerous on the student at the end of his/her school career, and Mr. Abrams said he could not see a student opting for this alternative. Staff thought the system could be structured in order for the student to opt for the alternative in ninth or tenth grade.

Mr. Moskowitz suggested that teachers, students, and parents should serve on the HSA Communication Project Team.

Ms. Cox pointed out that the superintendent is asking the state to slow down the process until everything is worked out. The Board has been on record on several elements on different occasions. There are concerns about the process the state is using to develop “fixes.” Furthermore, the state has not done very much in the way of including practitioners when it is developing a process.

The Board suggested additions to the letter should include a slowing of the implementation of HSAs, as well as information about the process and collaborative efforts with local boards. Mrs. O’Neill suggested that Board members and staff could testify before the Maryland State Board of Education regarding HSAs.

Ms. Brandman recognized that there were concerns about the long term, but the system must deal with the short-term problems of graduates from the Class of 2009. The present model is based on failure before the Bridge Plan is implemented with add-on projects. For a student working on multiple projects, Ms. Brandman asked if the project can be done in conjunction with a course the student is currently taking or as a complete add-on. Staff replied that the work can be combined with a class or as independent work. High School Plus is also a vehicle that can be used.

Ms. Brandman pointed out that the system had identified 718 students for the plan, and the impact on schools will not be the same at each school. How will that break down? Staff stated that to be eligible for the Bridge Plan, the student must have failed the HSA twice, been involved in an approved intervention, achieved acceptable attendance, and be on track for graduation. At the present time, there is a wide variety among schools with eligible students.

Ms. Brandman thought there was a need to communicate what is the real effect on schools, teachers, and students. How will this impact schools that are already trying to provide more foundation and support to make students successful. What are the realistic
opportunities for special education and ESOL students? Staff replied that the modified HSAs will be 50 percent larger than the existing HSAs because the state is adding items to validate the test for this year.

Mrs. O'Neill asked if the state has adopted the Universal Student Identification in order to simplify communication from one county to another. Staff agreed to provide more information on the universal ID for students in MCPS.

Ms. Brandman asked staff to provide a breakdown by high school of the number of students eligible for the Bridge Plan, based on the results of the May HSAs.

Re: LUNCH AND CLOSED SESSION

The Board of Education recessed for lunch and closed session from 12:20 to 1:30 p.m.

Re:  MONTHLY FINANCIAL REPORT

Mr. Larry Bowers, chief operating officer, stated that this financial report reflects the actual financial condition of Montgomery County Public Schools (MCPS), as of March 31, 2008, and projections through June 30, 2008, based on program requirements and estimates made by primary and secondary account managers. At this time, projected revenues exceed the amount budgeted for revenues by $3,800,000, while projected expenses are $14,100,000 below budget. Staff will continue to closely monitor both revenues and expenditures.

RESOLUTION NO. 174-08  Re:  PRELIMINARY PLANS—CABIN JOHN MIDDLE SCHOOL MODERNIZATION

On recommendation of the superintendent and on motion of Mrs. O'Neill seconded by Ms. Cox, the following resolution was adopted unanimously by members present:

WHEREAS, The Cabin John Middle School Facility Advisory Committee has provided input for the proposed schematic design; now therefore be it

Resolved, That the Board of Education approve the preliminary plans report for the addition of Cabin John Middle School developed by Samaha Associates, P.C.

Re:  UPDATE ON CAREER AND TECHNOLOGY EDUCATION PROGRAM

Dr. Weast invited the following people to the table: Ms. Shelley Johnson, director, Division of Career and Technology Education; Mr. Edmund Hodge, chief administrative officer and executive vice president, Adventist HealthCare, and vice-chair, Montgomery County
Business Roundtable for Education Advisory Board; Ms. Jessica Steinmann, student, Advanced Engineering—Project Lead The Way, Wheaton High School; Mr. Michael Wenzlaff, Jr., student, IT Foundation, Network Operations, Rockville High School; Ms. Kimberly Jackson, academy lead teacher, Seneca Valley High School; Mr. Foday Sackor, analyst, Accenture, Inc. and MCPS graduate, Academy of Finance program; Mr. Thomas DeGonia, attorney at law, Venable Law Offices, and president, Montgomery County Collaboration Board for Career and Technology Education.

An estimated 90 percent of the fastest-growing and best-paying occupations require at least some postsecondary education. Today, employers demand the same skill sets from new employees as colleges demand from new students. As a result, the days of nonacademic vocational education in Montgomery County Public Schools (MCPS) have been replaced with the expectation that all students graduate ready for college and career success.

Career and Technology Education (CTE) is undergoing a significant transformation to prepare students for successful futures by—

• increasing student engagement in learning through real-world connections;
• providing opportunities to earn industry/professional credentials to obtain higher entry-level wages; and
• ensuring defined pathways to high-wage, high-demand professions with potential for career advancement.

These elements are integral to Career Pathway Programs (CPPs) that have been developed in MCPS, based on national models. Both Advanced Engineering—Project Lead the Way (PLTW) and the Academy of Finance (AOF) provide engaging and challenging academics through a sequence of relevant courses and capstone experiences that also include Honors, Advanced Placement (AP), and college courses; internships; and attainment of industry/professional credentials. Design elements from these successful programs are driving the redesign of the remaining CPPs to best serve students.

Early results indicate an increase in the number of students who complete both University System of Maryland requirements and a CPP, positioning them for multiple opportunities after graduation. It is MCPS’ goal that all graduates be prepared for credit-bearing entry-level college courses and workforce training programs associated with high-wage, high-demand career fields.

Re: DISCUSSION

Mr. Abrams asked what the next steps are in career education. Staff replied that interactive media and the arts are also part of the CTE curriculum. Mr. Abrams inquired if there was a plan to integrate vocational skills into an academy. Staff replied that it is based on student interest. For example cabinet making was discontinued because there were only 10 students enrolled. However, there are other skill classes taught, such as masonry. Mr. Abrams stated that he supported the push to develop a skilled labor force in Montgomery
County. This is an area where alternatives can be presented to students to increase life-time skills. Finally, he stated that the system should not denigrate the value of those who want to work with their hands, and he worried that the system was not giving equal opportunity to those students.

Dr. Docca stated that she was pleased with the CTE curriculum because it widens the horizons for all students. The courses require students to read and write well, as well as focus on long-term goals. Furthermore, internships and partnerships are important.

Mr. Moskowitz suggested that the Strategic Plan language – An important milestone of Goal 1: Ensure Success for Every Student of the MCPS strategic plan, Our Call to Action: Pursuit of Excellence, states “All students will graduate prepared for postsecondary education or employment.” – should not separate postsecondary education and employment with an “or” but might be an “and.” Also, Mr. Moskowitz requested more information on the state requirement for the technology education credit.

Ms. Cox asked what MCPS’ capacity was if more students were interested in taking CTE courses. Staff explained that they could accommodate a 30 percent increase. Furthermore, they were looking to the future with a more integrated curriculum, beginning in elementary school, and CTE will become part of middle school reform. Ms. Cox suggested that communication is a key to success, since most of the community still has the old model in mind. Families should understand the benefits of these programs.

Mrs. O’Neill pointed out that math requirements are very high for many of the trades, and there needs to be the connection between school and the real world. Any child can dream and should be given the opportunity to succeed.

Ms. Brandman said that the vision is to build a strong foundation from which all students can be successful, including CTE and college.

Re: MABE PRESENTATION AND DIALOGUE

The executive director and president of the Maryland Association of Boards of Education (MABE) presented the highlights and programs available to local boards of education. MABE represents all boards of education and is the primary and preeminent voice for public education in Maryland. It challenges, leads, and assists local boards to create and maintain excellent public schools for all of Maryland’s children. MABE works collaboratively with all stakeholders to ensure that all students achieve all that they can envision as learners, dreamers, and producers.
