Re: READINESS FOR OPENING SCHOOLS
(ORAL)

The Board heard presentations and discussed the school system’s readiness for the opening of schools. On the first day of school, approximately 142,000 students will be greeted by more than 11,500 teachers—about 550 of them new to the school system this year. The new William B. Gibbs, Jr. Elementary School this year brings the total number of MCPS schools to 200—131 elementary, 38 middle, 25 high and six special schools. These and other major capital projects completed during the summer add 439,930 square feet of new and renovated space to MCPS facilities. The first day of school for students is Monday, August 31.

Staff brought to the attention of the Board the challenges in the MSA results. Mr. Barclay requested periodic updates on the MSA, AYP, and AMO. Mr. Bedford agreed to come to the Board with longitudinal tracking of students regarding MSA, AYP, and AMO. Ms. Berthiaume asked for, and Mr. Bedford agreed to provide, an analysis of by exactly how much MCPS missed AYP at each one of the 12 middle schools.

Re: MYMCPS PORTAL DEMONSTRATION

Dr. Weast invited the following people to the table: Mr. Stephen L. Bedford, chief school performance officer; Mr. Sherwin A. Collette, chief technology officer; Dr. Michael J. Doran, principal, Thomas S. Wootton High School; and Ms. Rose Ann Schwartz, staff development
Montgomery County Public Schools (MCPS) has developed an innovative web-based system, myMCPS, that simplifies access to data and information, provides a structure for online curriculum and multimedia resources, and facilitates districtwide staff collaboration and sharing of best practices. With the consolidation of disparate data systems into a comprehensive portal, MCPS staff now has a one-stop location to access a variety of pertinent information. The result is a savings in time and money, greater support for teaching and learning, and a more streamlined process for making decisions. The update provided a demonstration of how technologies similar to those used in popular social networking sites are being integrated with analytical and decision-support technologies to facilitate a professional learning community in which staff work collaboratively to strengthen teaching and meet the educational needs of our students.

The myMCPS portal offers an integrated, personalized web environment for staff, students, and parents that provides timely, accurate, consistent, and reliable access to data. Staff no longer needs to rely on disparate systems to retrieve information. By eliminating the use of multiple external systems, MCPS can budget resources more effectively. In addition to the licensing cost of those retired systems, the school system has reduced the number of data manipulations, processing, formatting, and transmissions to external vendors. Efforts also have been made to reduce and contain costs through the integration and publishing of curriculum documents, professional development content, and multimedia resources through the myMCPS portal rather than relying primarily on the production of printed materials.

Re: DISCUSSION

Board members thanked staff for the presentation, and they were very impressed with myMCPS. Mr. Barclay was interested in a follow-up in six months or so regarding what is working or not working with MyMCPS.
