Session 3 Learn: <u>UDL Story Telling</u>

Overview: One of the most powerful contributions you will make this year will be sharing your practical, real-life examples of how you implement UDL in your classroom. Digital story-telling is a vehicle for expression we often provide to students. For this discussion, you will be telling digital stories of UDL in your classroom. Your stories will highlight for others:

* Why these practices matter to a range of learners,
* How the tools and strategies you use work for you on a routine basis and in your lesson planning,
* Your plans for refining UDL practices in the future and
* Advice for other teachers interested in implementing UDL in their classrooms.

Photo Story is one of the simpler tools for accomplishing this but you may end up using other tools, including but not limited to: PowerPoint, Windows Movie Maker or Pixie.

Resources:

The first link provides you with resources to learn about Photo Story. The second is an example. Notice that it is not flashy. Think simple!

* Photo Story Quick Guides and Videos
* Photo Story Example

Session 3 Discuss: <u>UDL Story Telling</u>

Your discussions this session will focus on the Digital Stories. Meet in a location were videos/images can be shared and reflected on. Your story will highlight for others:

* Why these practices matter to a range of learners,
* How the tools and strategies you use work for you on a routine basis and in your lesson planning,
* Your plans for refining UDL practices in the future and
* Advice for other teachers interested in implementing UDL in their classrooms.
