- Students are only allowed to play with students in their classes at this time.

Triage Room

- For students displaying COVID like symptoms.
- Parents will be called, must be picked up within 30 minutes.

CoviD- 19 Pool Testing for students and staff

COVID-19 pool testing for students and staff participating in in-person learning will begin after spring break. Testing will begin in schools on Thursday, April 8. A few schools are piloting the program before spring break. Weekly tests will be available for all students and staff who complete the required consent form. Each self-administered swab test will be placed in a common tube for that classroom or pool and sent off to a central testing laboratory. A dedicated health professional will oversee and assist in test administration and collection in each school. The test detects whether the virus that causes COVID-19 is present in that pooled sample. Schools will receive results within a few business days and families will be notified of next steps if there is a positive case in their child's classroom or pool. A consent form, available in seven languages, is available on the website If you do not complete the consent form, your student will be opted out of testing.

MCPS Staff Vaccinations

Vaccinations Given as of 3/16

Johns Hopkins 8,408

DHHS* - 2,196

Total - 10,604

Employees who vaccinated on their own and reported to MCPS 2,675 •

Questions!
