

Dear AP Students and Parents,

The following from an email from CollegeBoard providing key information about the 2020 AP® Exams.

We are committed to provide free, remote learning resources and a new at-home testing option for this year's AP Exams. As promised, additional details are now available, and we'll continue to provide updates in the weeks leading up to the exams.

Exam Dates

Most AP teachers and students we surveyed prefer to test earlier, while the content is still fresh.

- Exams will be given from May 11–22.
- Makeup test dates will be available for each subject from June 1–5.
- Students can take exams at home or in schools, if they reopen.
- Each subject's exam will be taken on the same day at the same time, worldwide.
- [View the full testing schedule.](#)

We encourage you to remind your students about exam dates for their courses.

Exam Format

Most exams will have one or two free-response questions, and each question will be timed separately. Students will need to write and submit their responses within the allotted time for each question.

- Students will be able to take exams on any device they have access to—computer, tablet, or smartphone. They'll be able to type and upload their responses or write responses by hand and submit a photo via their cell phones.
- For most subjects, the exams will be 45 minutes long, plus an additional 5 minutes for uploading. Students will need to access the online testing system 30 minutes early to get set up.
- Certain courses—Art and Design: 2D; Art and Design: 3D; Computer Science Principles; Drawing; Research; and Seminar—will use portfolio submissions and will not have a separate online exam. All deadlines for these submissions have been extended to May 26,

2020, 11:59 p.m. ET. Teachers and students may receive separate course-specific communications.

- Students taking world language and culture exams will complete two spoken tasks consistent with free-response questions 3 and 4 on the current AP Exam. Written responses will not be required. We'll provide additional details in the coming weeks to help students prepare.

As usual, students' work will be scored by our network of college faculty and AP teachers, and will be reported on a 1–5 scale. We anticipate releasing scores as close to the usual July timeframe as possible.

We're confident that the vast majority of higher ed institutions will award college credit as they have in the past. We've spoken with hundreds of institutions across the country that support our solution for this year's AP Exams.

Special Benefit for Teachers

To help support teachers and schools that are struggling to collect and score student work for course grades, we'll provide every AP teacher with their students' responses from the online exams by May 26. Administrators and teachers can individually determine whether they'd like to use these results locally as part of a course grade or as a final exam.

Exam Security

Like many college-level exams, this year's AP Exams will be open book/open note. The exam format and questions are being designed specifically for an at-home administration, so points will not be earned from content that can be found in textbooks or online. However, students taking the exams may not consult with any other individuals during the testing period. We'll take the necessary steps to protect the integrity of each exam administration, as we do every year.

We're confident that the vast majority of AP students will follow the rules for taking the exams. For the small number of students who may try to gain an unfair advantage, we have a comprehensive and strict set of protocols in place to prevent and detect cheating. While some of these practices are confidential to maximize their effectiveness, students and education professionals can learn more about our [security measures](#).

At a minimum, test takers should understand that those attempting to gain an unfair advantage will either be blocked from testing or their AP scores will be canceled, and their high school will be notified as will colleges or other organizations to which the student has

already sent any College Board scores (including SAT® scores). And they may be prohibited from taking a future Advanced Placement® Exam as well as the SAT, SAT Subject Tests™, or CLEP® assessments.

Remote Instruction and Practice

On March 25, we began offering free [live AP review courses](#), delivered by AP teachers from across the country. The courses have been viewed more than 3.2 million times since they became available. [On-demand lessons](#) are now available for Art and Design, AP Capstone™, and Computer Science Principles.

In addition to sharing information about these classes with students, teachers who are providing remote instruction can use AP Classroom for most subjects. We've now unlocked secure free-response questions in AP Classroom so teachers can digitally assign relevant practice questions students can take at home. [Additional tips](#) for helping your students practice are available.
