

Student Volunteer Positions available in NIST Research Library Gaithersburg, MD Summer 2016

The NIST Research Library <http://www.nist.gov/nvl/> is looking for two students for the Student Volunteer Program (SVP) at NIST; this is an unpaid position for the summer. Volunteers must be at least age 16.

- Library Aid – to assist with special projects in the Research Library. Projects include participating in an Archival Journal Study by measuring stacks space for deaccessioning and reallocation of books and journals; updating the Library's Online Catalog and Electronic Resources Management System (ERMS). Experience in working/volunteering in libraries before a plus!
- IT Technician – assist with installing and tools and services in the Library's Innovation Corner and Emerging Tech Bar. Introduce new tools, such as the Sprout, Electronic Lab Notebook, data visualization SW, 3-D printers to library users and demonstrate functionality. This position requires technical curiosity, self-motivation and communication skills to make tools work from opening the box to installation and teaching how to use it. Great job if you like to tinker with electronics!

If you are interested please send a brief resume to: Rosa Liu rosa.liu@nist.gov (301)975-2787.

Founded in 1901, the National Institute of Standards and Technology is a non-regulatory federal agency within the [U.S. Department of Commerce](#). NIST's mission is to promote U.S. innovation and industrial competitiveness by advancing measurement science, standards, and technology in ways that enhance economic security and improve our quality of life.
