

Rockville HS - College Prep/Support

Course Title	GR	Description
Resource Program (Academic Intervention)	9	<p>The purpose of the Resource class is to teach students self-regulatory processes, learning strategies and skills including self-determination and self-advocacy-that will have a positive effect on how students approach, view, learn and meet academic demands. The instruction provided in the Resource class is designed to help students gain an understanding of their own learning style, develop self-regulatory skills and become proficient in the use of learning strategies and skills that can be applied to challenging academic content. The goal is for students to function effectively in other general education environment, access the general education curriculum, and master Individual Education Program goals. Students are expected to generalize the skills and strategies learned in the Resource class in their classes. Students are referred to the program by counselors and/or administrators.</p> <p><i>This course code should be used for grade 9 only.</i></p>
Resource Program (Special Education Support)		
Resource Program (Academic Intervention)	10-12	<p>The purpose of the Resource class is to teach students self-regulatory processes, learning strategies and skills including self-determination and self-advocacy-that will have a positive effect on how students approach, view, learn and meet academic demands. The instruction provided in the Resource class is designed to help students gain an understanding of their own learning style, develop self-regulatory skills and become proficient in the use of learning strategies and skills that can be applied to challenging academic content. The goal is for students to function effectively in other general education environment, access the general education curriculum, and master Individual Education Program goals. Students are expected to generalize the skills and strategies learned in the Resource class in their classes. Students are referred to the program by counselors and/or administrators.</p> <p><i>This course code should be used for grades 10-12 only.</i></p>
Resource Program (Special Education support)		
Resource Program (DHOH)	10-12	<p>The purpose of the Resource class is to teach students self-regulatory processes, learning strategies and skills including self-determination and self-advocacy-that will have a positive effect on how students approach, view, learn and meet academic demands. The instruction provided in the Resource class is designed to help students gain an understanding of their own learning style, develop self-regulatory skills and become proficient in the use of learning strategies and skills that can be applied to challenging academic content. The goal is for students to function effectively in other general education environment, access the general education curriculum, and master Individual Education Program goals. Students are expected to generalize the skills and strategies learned in the Resource class in their classes. <i>This course code should be used for grades 10-12 in the DHOH program only.</i></p>

For any other options or questions please see Ms. Alejandra Crawley, Resource Counselor (RC) for guidance and information.
