We invite all of our students to get support conceptualizing this year's research theme, evaluating thesis statements for effectiveness, developing skills in evaluating sources, and working to focus in on topics for research that will yield a stronger thesis statement and support a more fruitful research process. **This is interactive so come ready to participate!**

Students should plan to attend only 1 of the sessions. Please click the above link to register, which will allow students to share their topic and possible working thesis (rough draft) if they have it. If they don't, it is perfectly okay.

See you soon!
