

RecXtra – The Middle School After School Program

RecXtra is a cooperative program with the Middle School that is designed to supplement and enhance the school based after-school activities offerings. The program provides the ability of being site specific and thus better meeting the needs of the Schools administration and the Student Body. RecXtra activities provide the students opportunities to gain new experiences that they may not normally have at their school or in their community. Students interact with fellow students whom they normally do not interact, and they get to know their teachers outside of just an academic setting. RecXtra offers students the ability to learn new skills and to be involved in a positive environment that can provide them with the tools for Positive Youth Development. A lot of what we do gives our students greater general experience, positive self-esteem and greater choices in what they can do. These things hopefully can help them in being able to make better choices through the greater experiences that they have gained. The RecXtra programs that are offered are Free to the registered participants and allows them to ride the after-school activity bus.
